

# Adding Content to a Canvas Course

1. Click on “Modules” in your course navigation menu. Modules are used to organize course content by weeks, units, etc.
2. Create a new module by clicking on the “+ Module” button.
3. Give your Module a title. Add the module to your course.

4. Click on the plus sign (+) next to your module to add content to your module. This can be an assignment, quiz, file, page, or discussion.
5. Choose what you would like to add to your module from the drop-down menu. If you have already created any content outside of the modules area, you may select it here.
6. Once you have chosen what you would like to add to your module, click on the “new ” option.  
Ex: [New Assignment], [New Quiz], [New Page], [New Discussion],
7. Give the new item a name and click “Add Item.”

8. You will now see what you have added to your module. Click on the piece of course content that you just created to edit the page, assignment, quiz, or discussion. You can add your materials and adjust any necessary settings for submissions, grading, and due dates when applicable.

9. Publish your modules and any course content that you have added. This will allow students to see the materials that you have added. To publish the module and any course content, click on the circle icon next to what you would like to publish. A module must be published in order for students to see any content posted to it. A green check mark will appear, which indicates that a piece of content or module is published.

10. Make sure that your course is published from the home page so that students can access your materials.
